

## TERRAM WEEDGUARD™

### Permanent permeable weed suppression geotextile for landscaping, gardening and construction applications.

Terram WEEDGUARD is proven for suppressing weeds in landscaping and garden applications without the need for chemicals. This geotextile is designed to allow the passage of water, oxygen and nutrients while blocking weeds. Terram WEEDGUARD is installed at the interface between soil and a decorative layer such as bark chippings, stone chippings, pebbles or gravel.

The geotextile is unobtrusive grey, easy to cut, does not fray, simple to position, flexible to adapt to uneven ground and can be secured using plastic pegs available from Fiberweb Geosynthetics.

- Weed-control fabric which avoids the use of chemicals
- Lightweight and simple to install
- Maintenance free and resistant to microbiological and chemical attack
- Ideal for landscaping, garden beds and beneath decking

Terram WEEDGUARD is supplied in roll sizes to suit small gardens to large landscape project:

For Fixing Pins & Pegs see page 9
